Statin Therapy for Patients with Diabetes	61.54%	65.92%	\$ 25.00

How does the P4P Program work?

- The P4P measures are based on Buckeye Medicaid State P4P measures and are consistent with NCQA and HEDIS quality performance standards
- Each measure is assigned an incentive dollar amount and target percentage
- 2 tier targets based on HEDIS 25th and 50th percentiles
 - Target 1: 75% of incentive dollar amount
 - Target 2: 100% of incentive dollar amount
- Each measure is evaluated independently and can qualify and receive an incentive payment for one, multiple or all of the measures
- Measures are intended to be closed with claims data, although supplemental data is accepted
- Payments are made via paper checks, based on TAX ID
