

Improving Outcomes for People with Disabilities

A series of 10 Virtual Roundtables for Health Care Professionals

Hosted By:

People with disabilities experience consistent barriers to clinical care, preventative services and good health. Join the Ohio Association of Health Plans, OCALI and an amazing lineup of speakers to build your confidence, skill and ability to improve outcomes for people with disabilities.

- Only 50% of children who should receive an initial or periodic development screening do.
- Rates of emergency department utilization are 2-3 times higher for children with special health care needs.
- Adults with disabilities are more likely to be inactive, have high blood pressure, smoke, and be obese than their non-disabled peers.
- Nearly 75% of all Medicaid expenditures are related to disability.
