-

General Information

- The Statewide UPDL is not an all-inclusive list of drugs covered by Ohio Department of Medicaid.
 - Medications that are new to market will be non-preferred, PA required until reviewed by the Ohio Department of Medicaid Pharmacy and Therapeutics (P&T) Committee.
 - The document is listed in sections defined by therapeutic class. Drugs are listed by generic name if a generic is available unless the brand name of the drug is preferred. In most cases, when a generic for a brand-name drug is available, the generic drug will be preferred, and the brand name will be non-preferred. Some drugs may also require a specific manufacturer or the brand to be dispensed.
 - Ohio Department of Medicaid will only cover drugs that are part of the Medicaid Drug Rebate Program, with limited exceptions. This document may not reflect the most current rebate status of a drug (i.e., a drug may be listed on the document but is non-rebateable and therefore non-payable).
 - Some therapeutic categories are grandfathered. These categories will be denoted with an “*” next to their title on the table on contents and their place within the criteria document.
 - Some therapeutic categories may have quantity limits on specific drugs detailed in the criteria document, however this is not an all-inclusive list. For a list of the quantity limits on specific drugs, please reference the Quantity Limit Document found here: [Quantity Limits Document | pharmacy.medicaid.ohio.gov](#)
-

Terminology/Abbreviations:

AR (Age Restriction) – An edit allowing claims for members within a defined age range to be covered without PA

BvG (Brand Preferred Over the Generic) – The brand name drug is preferred over the generic equivalent

PA (Clinical Prior Authorization) – A prior authorization (PA) is required before the drug will be covered

QL (Quantity Limit) – A limit on the quantity that will be covered within a given time frame

ST (Step Therapy) – Drug requires a trial with one or more preferred drugs before being covered

AR = Age Restriction **QL** = Quantity Limit **ST** = Step Therapy Required **PA** = Clinical Prior Authorization Required **BvG** = Brand Preferred Over Generic

New UPDL Criteria Format

- Beginning January 2023 and with a few minor exceptions, all therapeutic categories have the same standardized outline format. The design of this new format is intended to have a cumulative approach bottom-to-top.

Example Category

LENGTH OF AUTHORIZATIONS: X days or Initial: X days; Subsequent: X days (if different)

GRANDFATHERING*:

Patients who have a claim for a non-preferred drug in the previous 120 days will be automatically approved to continue the drug. Patients who have taken the drug previously, but do not have claims history (e.g. new to Medicaid), will need to submit a prior authorization in order to continue coverage.

ALL AUTHORIZATIONS: Must be prescribed in accordance with FDA approved labeling

CLINICAL PA CRITERIA (if applicable):

“DRUG” CRITERIA (if applicable):

STEP THERAPY CRITERIA:

- Must have had an inadequate clinical response of at least X days with at least X preferred drugs

NON-PREFERRED CRITERIA:

- Must provide documentation of medical necessity beyond convenience for why the patient cannot be changed to a preferred drug (i.e., allergies, drug-drug interactions, contraindications, or intolerances) **OR**
 - For any nonsolid oral dosage formulation: must provide documentation of medical necessity for why patient cannot be changed to a solid oral dosage formulation
- Must have had an inadequate clinical response of at least X days with X preferred drugs
 - For non-preferred extended-release formulations: must provide documentation of an inadequate clinical response with its immediate release formulation (if available)
 - For non-preferred brand names that have preferred generics: must provide documentation of an inadequate clinical response or allergy to two or more generic labelers (if available)

ADDITIONAL “DRUG” CRITERIA (if applicable):

ADDITIONAL INFORMATION (if applicable):

SUBSEQUENT AUTHORIZATION CRITERIA:

- Must provide documentation of patient’s response to treatment from baseline and/or attestation of clinical stabilization

QL – Drug: X doses per X days

AR – a PA is required for patients X years and older OR younger than X years

Interpretation of New UPDL Criteria Format

- Beginning January 2023 and with a few minor exceptions, all therapeutic categories have the same standardized outline format. The design of this new format is intended to have a cumulative approach bottom-to-top. The following scenarios will aid in illustrating this point:

Scenario 1: Clinical PA drug

- All Authorizations
- Clinical PA Criteria

Scenario 2: Clinical PA drug with drug-specific criteria

- All Authorizations
- Drug-Specific Criteria

Scenario 3: Step-Therapy drug

- All Authorizations
- Clinical PA Criteria (if applicable)
- Step Therapy Criteria

Scenario 4: Non-Preferred drug

- All Authorizations
- Clinical PA Criteria (if applicable)
- Step Therapy Criteria (if applicable)
- Non-Preferred Criteria

Scenario 5: Non-Preferred drug with drug-specific criteria

- All Authorizations
 - Clinical PA Criteria (if applicable)
 - Step Therapy Criteria (if applicable)
 - Non-Preferred Criteria
 - Additional Drug-Specific Criteria
