

TAKE CONTROL OF YOUR heart health

Heart disease is the number one killer in Ohio and in the nation¹. And now, COVID-19 adds a new layer of complexity. Learn the risk factors and symptoms—and take steps to live heart healthy.

OHIO+HEART DISEASE

28,000
deaths each year¹

#12 in the U.S. for
highest rate of deaths¹

#1 KILLER¹

Living heart healthy is more important than ever before.

PEOPLE LIVING WITH THESE HEART CONDITIONS

- 1 Heart Failure**
- 3 Coronary artery disease**
- 2 Cardiomyopathies**
- 4 Pulmonary hypertension**

have an increased risk of severe illness from **COVID-19**, making them more likely to be hospitalized, need intensive care, require a ventilator to breathe, and die.
