**Protein** helps us to grow and make muscles. Protein is found in meat, chicken and fish. It is also in nuts and some beans. Milk, eggs and cheese are also good sources of protein. But remember, protein can have a lot of fat that is not so good for us, so choose the low fat kinds of these foods.

**Vitamins** are found in a lot of foods we eat everyday. There are many types of vitamins. Our bodies need them to grow and stay healthy. Fruits and veggies, milk and eggs, nuts and meat all contain one or more vitamin. Vitamins are named for letters in the alphabet: A, B, C, D, E and K. Examples are: Vitamin A, found in carrots and sweet potatoes, helps you see well, even in the dark. Vitamin C, found in blueberries and strawberries, helps you heal if you scrape your knee. Vitamin D, found in milk and eggs, helps to build strong bones.

**Oil** is all fat, so you only need a little. Cooking foods in only oil will give you too much fat. Try cooking with chicken broth instead of oil. Another healthy way to cook is to grill or bake.

**Calcium** is a mineral that helps to build bones and teeth. Growing kids need calcium almost every day. Milk, yogurt and cheese are good sources. Choose the low fat versions of these foods.

**Carbs** - short for carbohydrates (car-bo-hy-drates) - give us the fuel our bodies need to stay active. There are different types of carbs. Some get used up fast like sugar or white bread. Others last longer like beans or whole wheat bread. Try choosing the carbs that last longer so your energy lasts longer!

**Fat:** Our bodies need some fat, but only a little to stay healthy. Fats are found in a lot of foods. Some of these foods include butter, oil, meat and ice cream. Fat can also be added by the way we cook food, such as frying foods - think of French fries and potato chips. Too much fat can make us gain weight and be bad for our hearts. To avoid too much fat in your diet you should eat less fried foods, candy and cookies. Choose low fat milk and cheese, and take the skin off chicken. Also, instead of fried or breaded chicken, try grilled or baked.

**Sugar** is sweet and it tastes good. But it is one of those carbs that get used up fast, which means it only gives you a short burst of energy. Too much sugar can make us gain weight and give us cavities in our teeth. Soda and candy have a lot of sugar in them so these should be sometime treats, not everyday things.

**Fiber** helps to keep you full longer. It is found in fruits, veggies, beans, brown rice and whole wheat bread.
