## Policy Overview

Facility charges for hospital-based outpatient clinics are routinely billed by participating hospitals. In most cases, the facility charge is for the physical room in which service by another provider (typically a physician) is rendered. The hospital is typically not providing in-hospital services such as nursing. In such cases, the facility charge is not for actual hospital services and is not governed by the participation agreement between the health plan and the hospital.

The purpose of this policy is to define payment criteria for facility charges rendered at outpatient hospital clinics to be used in making payment decisions and administering benefits.

## Application

- Hospital-based Outpatient Clinics (Revenue Code 510)

### Excludes

- Excludes Critical Access Hospitals
- Excludes Safety Net Hospitals

## Policy Description

It is the policy of the health plan that facility charges for hospital-based outpatient clinics (revenue code 510) do not represent covered services under the health plan provider participation agreements. As such, the charges are not applicable to be reimbursed under the rate exhibits set forth in such agreements unless specifically addressed.

Health plans that reimburse providers for facility charges are required to compensate providers on the basis of the *reasonable* cost of the care or *reasonable* charge for the services.

## Reimbursement

- A. The health plan has determined that additional reimbursement for facility charges for outpatient hospital clinics is not warranted unless determined by state or health plan policy. The health plan will pay all other revenue codes in accordance with the provider participation agreement in place between the health plan and the hospital.
- B. If the hospital can demonstrate the provision of actual hospital services such as those that may be provided in a wound clinic or dialysis clinic or other clinic, the health plan may pay for such services in accordance with the provider participation agreement.

- C. The fact that the health plan has contracted with facilities to reimburse at percentages of billed charges does not mean the health plan must blindly reimburse for all charges, regardless of whether they are reasonable.

### Safety Net Hospital

Providers that organize and deliver a significant level of healthcare and other health-related services to the uninsured, Medicaid and other vulnerable patients.

### **Additional Information**

When applicable, the health plan encourages providers to be transparent with patients and make them aware that they are entering a part of the main hospital and may be billed accordingly. Furthermore (when applicable) hospital outpatient departments not located on the provider’s main campus should provide written notice to the member, before delivery of services, of the amount of the beneficiary’s potential financial liability (for example, copay for the outpatient hospital visit and the physician service).
